

## JUST GLEANINGS

### OIL PRORATION BOOSTED

Turner Valley oil production will be boosted to 17,500 barrels per day from the former 15,000 barrel quota by a Conservation Board order effective April 1st. The increase is to meet heavier oil and gasoline demands to spring farm activities and trucking. Increased car traffic also is a factor. Oil operators will benefit to the extent of nearly \$100,000 per day additional revenue.

### ALBERTA HOUSE PROROGUES

Lieutenant-Governor J. C. Bowen, giving assent to 27 more bills, prorogued the eighth session of the eighth legislative assembly of Alberta at 10:40 p.m. Monday night. Prorogation came after a lengthy day's work that saw one bill killed and two others given third reading, after the House had defeated motions to give them the six months' respite.

### SEED GRAIN ADVANCES IN NECESSITOUS CASES

Seed grain advances for Alberta farmers will be provided in necessary cases, the province acting in co-operation with municipalities, according to an announcement made this week by Hon. D.H. Mullen.

An application for the province made to the Dominion government for guarantees to the extent of \$300,000 has been refused, but despite this the province will go ahead with taking care of seed advances.

"We are acting in co-operation with the municipalities," the minister said. "It will be necessary for the municipal district to pass upon the merits of the application. In cases where there have been no previous applications for other reasons, assistance could be provided."

### EASTER EGGS LONG TRADITION

The origin of the Easter egg tradition is lost in antiquity but year after year the delightful practice of adorning the breakfast table with eggs on Easter Sunday morning continues. It matters not that the first fresh eggs no longer come with the first, the beginning of Spring. The modern model of the humble hen's egg, and usually does, produce her excellent product the year round. Easter is still associated with eggs, with the hen scratching in the warming earth, newly aware of her destiny.

### OIL FROM COAL

For the past nine years the Federal Bureau of Mines has been investigating the possibilities of converting coal, peat, and bituminous oil. This process is known as hydrogeneration. Coals from a number of Canadian oil fields have given excellent yields of oil in the laboratories. It is believed that the process can be developed to meet the needs of the consumer when the cost is justified by a decline in the price of oil. The process has been used in England and Germany commercial plants for converting coal into oil are said to be in successful operation. —Hon. T.A. Crerar.

## \$92,000 ESTIMATED FOR SCHOOL EXPENDITURES IN RURAL DIVISION 30

### May Arrange for High School Facilities Soon

#### INSURANCE CUT

According to word from the trustees of the Drumheller Rural School Division, estimates amounting to \$92,000 have been passed for the year, this being \$15,000 less than was expended by the school districts in the Division last year. The trustees have allowed for all possible expenditures, and no deficit should result at the end of the first year of operation of the enlarged district.

Junior service in the past has been done mainly by the teachers without remuneration, while in 27 cases as high as \$18 a month has been paid. In order to avoid any controversy in the future the trustees will set a rate for this work.

Insurance on school property was discussed by the board and a rate of 60c per 100 has been obtained an against rates as high as \$2 in the past by individual schools.

Complete census of rural students who plan to enter high school next term will be made with a view of organizing better high school facilities. Most of the rural school trustees will concentrate in the establishment of High Schools in central areas.

A delegation met with the trustees seeking uniform salary schedules for teachers in the rural areas. The delegation asked for a minimum of \$840 with annual increases until, after ten years of continuous service, a \$1200 maximum has been reached. Married teachers, whether male or female, would, under the proposed contract, receive slightly higher remuneration, while teachers who handled high school subjects would also receive higher salaries, as would principals of two-room schools.

### LONG YEARS AGO

April 5, 1928

Mr. and Mrs. S.J. Garrett have returned from a six-weeks' visit to the Pacific Coast.

Lawrence and Wilfred Poxon have purchased a Ford-R automobile.

At the annual meeting of the Carbon Curling Club on Monday a balance of \$122 was reported by the secretary. Officers elected were: President, J.J. Greenan; Vice-President, G.W. Malton; Sec.-Treas., A.F. McKibbin.

S.J. Garrett unloaded a car of the new Chevrolet trucks this week.

Mr. and Mrs. S.N. Wright and family have moved back to farm after spending the winter in town.

### S. DEPOLLA DIES AT 'EVENTIDE'

S. Depolla, aged 69 years, died at Eventide Home, Glenora, last week. He was born in Italy and spent most of his life here. He was a widower and by occupation a miner. Funeral services were held March 25th with Maj. J.J. Sutherland officiating, and interment followed in Eventide cemetery.

## SIXTY-CENT WHEAT WILL NOT COVER COST OF FARMING OPERATIONS

### Provision Being Made For Acreage Bonus WEST DISSATISFIED

A 60c minimum Wheat price for One Northern at the terminal was announced by Hon. W.D. Foul, minister of agriculture, at the federal House of Commons on March 27. This is to go into effect August 1st. In addition to the minimum price further legislation will be introduced providing for the payment of an acre bonus. It is not certain whether the acre bonus will be 82 or 83 an acre, or whether it will apply in a yield of 10 bushels or up to 20 bushels to the acre. The original intention was to make the total bonus limitation \$400 for each farm.

The bonus plan is somewhat involved, but it provides for the setting of an arbitrary price of, say 80c. For every cent the average market price falls below the 80c figure a bonus of 20c an acre will be paid to farmers on approximately one-half their seed. At 80c an acre, a bushel of 2000 seeds, the maximum of such a bonus is thereby fixed at ten times 20c or 82 an acre. Under the sliding bonus scale the payments were originally planned to be made to the maximum only on land producing under 15 bushels an acre.

The announcement of the 60c minimum price came as a shock to western Canada. The greatest possible pressure had been brought upon the government to continue the 80c figure, but apparently unavailingly. The price for One Northern at the terminal means a price on the farm for the average grade of 30c. The west cannot continue to be an important wheat producing area on 30c wheat. Western Canadian farmers have had to endure severe hardships for many years. Poor crops and low prices have been responsible for their plight, but this has been aggravated by the high cost of the goods and services farmers have to buy. This is an expensive country to live in.

A net figure of 3c a bushel does not begin to cover the cost of wheat production in Western Canada, even if the acre bonus is augmented by means of a couple of hundred dollars in the way of a bonus. Farmers can only obtain a bare sustenance at that price level.

The announcement of the government's price decision has been met with a storm of disapproval from almost every quarter of Western Canada. This is the most unpopular move as far as the west is concerned, that any federal government has ever

## E.L. GRAY FILES \$15,000 DAMAGE SUIT AGAINST PREMIER W.M. ABERHART

Action for \$15,000 damages was instituted in Edmonton Friday by E.L. Gray, Liberal leader, against Premier A.B. Gray and Hon. E.C. Manning, provincial treasurer. Just when the statement of claim would be served on the defendants is indefinite. Sections of the legislature are expected to meet on Monday after a session had to be considered. The statement of claim was filed in the statement allegedly issued by Premier A.B. Gray 24th referring to a flood of the Eastern Irrigation District, entered at Brooks, and remarks allegedly made by the premier and Mr. Manning at the Prohibitory Conference in Edmonton March 26th.

### LOCAL NEWS ITEMS

J.H. Oliphant was a Calgary visitor last week end.

Mr. and Mrs. G.H. Dishaw and family left Wednesday for Milho, where Mr. Dishaw has been appointed agent of the Pioneer elevator.

Mr. and Mrs. Stewart Hay spent Tuesday in Calgary.

Born to Mr. and Mrs. Chris Harsh on March 15, a son.

### BOY SCOUT NEWS NOTES

BY THE S. M.

On Friday last a very successful car party and dance was held in the West Carbon mine hall, about 130 people attending.

The first prize winners were Mr. Dick Dade and Mrs. A. Hunt, while Mr. Andy Mielan and Miss Isabelle Summers won the consolation. Following the carle the dance got under way and Miss Peggy Stanfield was a prize in the Lemon Dance. Incidentally we had no lemon for this particular dance and apples had to be substituted. The apples quickly showed considerable signs of wear through being repeatedly dropped on the floor. It is a pity that where an apple can get in a short time, it is quite convinced that if there had been a few \$100 bills floating around my hands would have stuck to them quite contently. Unfortunately, however, there were none.

A quiz game held immediately following supper, and contested by Mrs. C.H. Nash, Mrs. T. Wheat, Miss Sylvia Atkinson, Mr. Nick Zalaski, Mr. F. Flay and Mr. Stanfield was won by Mr. Stanfield.

Mr. C.H. Nash made a short address on the subject of the "A-a-a-h's" and then some wholehearted hand clapping. When the uproar subsided Mr. Nash felicitated the "A-a-a-h's" and Gentlemen, April 1st! ("The day happened to be 1:20 a.m., April 1st.") would again like to ask all those who helped to make the affair successful to accept the thanks and appreciation of the 1st Carbon Boy Scouts and Wolf Cubs.

### LINE ELEVATORS PROTEST SIXTY-CENT WHEAT

"Line Elevators will lend support in seeking justice for the wheat producer at Ottawa," said W.E. Robertson, Calgary, president of Western Wheat Producers' Association, in testing against the Dominion Government's 60-cent wheat guarantee legislation.

In a statement issued, he said: "The Western Grain Dealers' Association, through its 1,000 line country elevators in Alberta, has given its unqualified and loyal support to the work of the Bracken Committee, and in particular, has supported the conclusion of a price of at least 80c for No. 1 Northern, hard Ft. William under a Wheat Board, as no less than a subsidy to the farmer. The Western Canadian farmers in the northwestern provinces, which reveal in the international wheat markets of the world, any less support in, in plain language, a desertion of the great unprotected industry of wheat-growing, which means so much to the native life of Canada and on which Western Canada is absolutely dependent."

"The present proposal of the Dominion Government for a 60c wheat price represents an average price for One Northern of approximately 40c on the farm. Notwithstanding the ample remuneration provided for additional aid to farmers or agriculturalists or a relief fund, the announced policy means that the wheat industry has been completely abandoned to the disaster that must overtake it if it is left subject to international forces, which it cannot control, and that Western Canada will be treated as a depressed area and Western farmers as a class of the most unfortunate in the world. "We cannot believe that the Western Farmers or the Agricultural Committee of the House of Commons will, if the facts are placed before them, accept any such surrender. The Western Grain Dealers' Association has already indicated its attitude. It will lend whatever support they can to any representations in favour of justice to the Western Producer, and may be made to the Agricultural Committee of Parliament, to whom the whole matter should, in our opinion, be at once referred."

Miss Elsie Sherring has returned to her home in the Granger district.

Dorothy and Irvin Mortimer have moved into the Dick Gimbel house in town.

Mr. and Mrs. Len Paxon left Tuesday for Edmonton to attend the wedding of Mrs. Paxon's niece.

### SUMMER GARAGE SCHEDULE

Commencing on April 2nd the garages in Carbon began operation under the plan operated last year. Each garage took a turn at staying open on a Sunday. April 9 Syd's Service will be open; April 15th Carbon Auto Service will be open, and April 23 Garrett Motors will be open. This garage will be maintained throughout the summer.

## THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

There has never been, I suppose, in the whole history of Western agriculture, a time when there were so many farmers experimenting by farmer.

This very abundance of good things, however, brings difficulties for many farmers are experimenting by growing a number of these varieties, each experimenting, I suggest, from my own practical experience, must be done with the greatest of care, otherwise farmers may find their crops becoming badly mixed.

Most wheat varieties tend naturally to cross with each other; whenever this occurs a veritable stream of strains are thrown off, many of them poor in yield and poor in quality. Year after year these undesirable strains increase, resulting eventually in severe money losses to the farmer. Different varieties of wheat grown on one farm, therefore, should be kept separate from each other by a wide rowing, either of clean land, or a drill row of oats, and then the greatest of care must be taken in seeding, harvesting and threshing, so that the different varieties do not become mixed with each other.

It is a pity, however, I suggest, for a farmer to grow only one variety on a large scale, and then let the "indistinctness" of the experimental

Following factors have tended to raise prices: Germany harvesting for 55 million bushels or 25 per cent of the total European wheat surplus. Rumor that the U.S. wants to barter wheat for Russian manganese. Unsettled and threatening political conditions in Europe. Small corn acreage planned for next year in U.S.

Following factors have tended to lower price: Continued useful rains and favorable moisture conditions in Australia. Favorable weather conditions for Argentine corn harvest. Prevail of winter-coldings generally favorable in most European countries and North Africa. Tariffs against Germany by U.A. increased by 25 per cent.

### LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. H.C. Willson and Mrs. V.E. Harney were Calgary visitors last Tuesday and Friday.

Mr. S.N. Wright returned Monday from Winnipeg, where he attended the funeral of his mother.

"The Carbon United Church Ladies' Aid will present "Here Comes Charlie" a comedy-drama in three acts, in the Farmers' Exchange Hall, Carbon, on Friday and Saturday, April 14 and 15.

Miss Grace Cameron was a Calgary visitor last Thursday.

Mr. and Mrs. Perry Johnson of Carbon were Calgary visitors Thursday.

Carl Moorhouse returned to Carbon Saturday.

Rain and snow last week brought an end to spring-like weather. March and April seem to have changed places on the calendar this year.

Tomorrow is Good Friday and a holiday. All plans of business will be closed. Easter Monday is not a holiday, although banks and government offices in the province will remain closed.

## LIFE MEMBERSHIP IN LADY ROBERTS I.O.D.E. TO MRS. H.C. WILLSON

### Representation Made at Regular Meeting Monday

#### FIRST REGENT

The members of Lady Roberts Chapter, I.O.D.E., honored Mrs. H.C. Willson on Monday night at their regular meeting when they presented her with a badge and life membership in the order.

Mrs. C. Oliphant made the presentation. Mrs. Willson has been Regent of the Chapter since its formation, and resigned this year from that position, and in recognition of her services the members made the presentation.

The meeting was held at the home of Mrs. C. Paxon and hostesses were the Misses Isabelle Summers and Joyce Chapman. Two new members were admitted to the Chapter, Mrs. H. Ray and Mrs. Paxon.

## CYRIL POXON IS NEW TENNIS CHAMPION

At the annual general meeting of the Carbon Lawn Tennis Club, held this week, the following officers were elected for the coming season: Honorary President, Rev. S. Evans. Honorary Vice-President, Rev. W. H. McDonald. President, Cyril Poxon. Sec.-Treas., W.A. Braisher.

Executive Committee: Messrs. B.C. Downey, Len Poxon, J.M. Macdonald, C. Poxon, N.E. Nash and W.A. Braisher.

It is worthy to note, however, I suggest, for a farmer to grow only one variety on a large scale, and then let the "indistinctness" of the experimental

Norman Nash was appointed treasurer and the appointment of a secretary for the courts was left in the hands of the president.

If you have friends visiting you, or you have been visiting friends, it is news that The Chronicle would like to have. Just let us know of any happenings in the district and if it is of news value it will find its way into the columns of this paper.

**MAYOR'S GRAND-DAUGHTERS PRESENTED AT COURT**

One of the most encouraging features of the cultural program has been the willingness of farmers in all groups, ranging from fifty in number to three or four hundred, to organize into agricultural improvement associations to control soil drifting; to establish seed supplies in the various districts; to organize for the development of shelter belts for the home and the field, and to establish seed centres for drought resistant cereals and grasses. There are now about 130 Agricultural Improvement Associations, with a membership of 20,000 farmers, located in the sections where drought is the most prevalent. The technical assistance of the Dominion Experimental Farms, these farmers are successfully overcoming their difficulties.

At the other end of the list were 106,764 persons with salaries up to \$2,000 who paid \$1,152,000.

Mr. Hisley said collections for 1933 would be about \$40,000,000.

Piano owners should avoid rapid temperature changes, refrain from standing the piano against an outside wall during winter, keep room air reasonably moist, hang a bag of mothballs inside it during the summer, and have it tuned by an expert twice annually.

The Duke has, it is believed, paid one private visit to England since his abdication. He arrived at an R.A.F. base about a year ago for a brief and secret meeting with Queen Mary.

reasons for Miss Carden's generosity to the red-coated police force remained a mystery. So far as known she had never been to Canada. Apparently, however, she took an interest in organizations which ordinarily don't receive legacies.

**First With Modern Development**  
 Pace it was a dug-out, a cave, then an igloo, a wigwam, a shack, cabin, a cottage, or a mansion. Old luxuries used to be: a fireplace, a breakfast nook, a bathroom and porch. We then progressed to the budget house, the linoleum house, the electrical house, the insulated house, the stucco house, the bungalow, the modernistic house and the pent house.

Presently the house which is now air conditioned, which is not made largely of glass, which does not have a deck roof and a recreation basement, or which does not revolve in its foundation to keep pace with the sun, will be out of date.

Borneo is the third largest island in the world, with an area of 280,000 square miles.

Miss Sheila and Miss Pamela Johnson, grand-daughters of the Lord Mayor and Lady Mayoress of London, photographed as they left the Mansion House for Buckingham Palace to attend the first Royal Court.

Most prominent, of course, in the pioneering of fruit growing on the prairies is the Dominion Experimental Farm at Morden, Manitoba, which for many years has been the famous centre of fruit culture and distribution to the prairie farms of apples, pears, plums, cherries, apricots, grapes and other fruits. Thousands of seedlings bear first fruits every year, and the number of new varieties of fruit suitable for prairie growth, evolved by the Morden Farm, is extensive. Two years ago, the original apple plantation on the Morden Farm attained its 21st year, and, having served its purpose, is gradually being broken up.

In the past there had been Canadians who declared democracies did not get things done and that a dictator was needed but they were not

## COMMONS HEARS CANADA'S POLICY IN WORLD AFFAIRS

Ottawa.—National planning and co-ordination will be necessary if Canada becomes involved in war but so long as the present government remains in office conception of men for overseas service will not be attempted, Prime Minister Mackenzie King told the House of Commons in his annual review of Canada's policy in world affairs.

In a two-hour speech to a full house and before packed galleries Mr. Mackenzie King reviewed events in Europe since the beginning of the German-Czechoslovakian crisis last summer.

Although he painted a dark picture, he affirmed his belief war was not inevitable and expressed hope the rivalry between democratic and totalitarian states might be turned into a contest to see which system could accomplish the greatest work for welfare rather than into a clash of arms.

Leaders of Canada's two main political parties are now in agreement on the question of co-ordination.

Hon. R. J. Manion, Conservative leader, declared that national and compulsory service overseas. Following the prime minister in the debate Dr. Manion said the first duty of Canadian public men was to maintain the unity of Canada.

"In a war to save our liberty of others and thus our own," said Mr. Mackenzie King, "we should not sacrifice our own liberty or our own unity. Planning and co-ordination would be essential but the necessary co-ordination could be made, and if it were made, without sacrificing those vital ends and conditions of our country."

"Profits could and would be rightly controlled and profiteering suppressed. But men's lives and the nation on the same basis of goods and profits."

"The present government believes that conscription of men for overseas would not be a necessary or an effective step. Let me say that so long as this government may be in power no such measure will be enacted."

"We have full faith in the readiness of Canadian men and women to rally to the defence of their country and their liberties and to resist aggression by any country seeking to dominate the world by force. There is in our people, in every part of Canada, a deep sense of duty, a power of facing realities, a tenacious courage, that would rise to any emergency."

Canada had to "choose between keeping her own house in order and trying to save Europe and Asia. The idea that 'every 20 years this country should automatically and as a matter of course take part in war overseas for democracy or self-determination of other small nations, that a country that has all it can do to run itself should feel called upon to save, periodically, a continent that cannot run itself and to these ends risk the lives of its citizens in bankruptcy and political disunion, seems to many a nightmare and sheer madness.'"

## Undermining Confidence

Dunning Suggests Measures Be Taken To Deal With Published Statements

Ottawa.—Strong measures to deal with published statements calculated to undermine confidence in the government and parliamentary institutions were suggested in the House of Commons by Hon. Charles Dunning, minister of finance.

He referred particularly to an article in The Winnipeg Free Press alleging commissions were paid to Canadian agents on purchase of aeroplane engines from a British firm.

Hon. Ian Mackenzie, minister of defence, said the article was "similar to other falsehoods which have been spread recently," and by the same writer whose article on the honorary air council had been denied by Air Marshal W. A. Bishop.

### Al Mail Doubled

Cornwall, Ont.—The daily volume of mail carried over the Trans-Canada Air lines system has doubled since inauguration of the service last month ago. Hon. Norman McLarty, postmaster-general, told the Cornwall board of trade.

### Drop In Imports

Ottawa.—Canada's imports in February dropped to \$48,000,234 from \$46,951,618 in February, 1938, the Dominion bureau of statistics reported. United States was the leading contributor.

## General Franco's Victory

Whole Of Spain Now Under Control Of Nationalists

London.—General Franco's victory puts a brake on the efforts of Great Britain and France to erect a "Halt Hitler" front in Europe.

The two democratic governments, faced with another worrisome factor bound to influence their reshaping of foreign policy, are likely to proceed even more cautiously and less vigorously than in the past.

Republican Spain has crumbled and the Nationalists look over a large city as the war was officially proclaimed ended.

Valencia, third largest city after Barcelona and Madrid, fell 24 hours after Madrid. In rapid succession, the Nationalist fanatics took over other key towns, and the naval base at Cartagena.

The end of the war was proclaimed in an official broadcast from Burgos, the Nationalist capital. The capital will now be moved to Madrid.

Associated Press reports that General Jose Miaja and his staff, fleeing from General Franco's conquest, were taken to the Argentine from Valencia at La Senia airport, near Oran, Algeria. Aboard Miaja's plane were a colonel and a major, his personal staff.

Thirteen additional planes from Valencia carried other members of the Nationalist staff, as well as senior civilian officials of the national defence council, governing body of Republican Spain, for the last three weeks of the war. Miaja was its head.

Control of all Spain's 52 provinces was claimed by Nationalist headquarters.

## Increase Territorial Army

To Be Put On Wartime Basis Of 340,000 Men

London.—Great Britain has ordered a great increase in its territorial army to a wartime basis of 340,000 men as diplomatic gestures against Europe's put on the same basis of goods and profits.

With British and French general staffs in conference and the government reported seeking a secret agreement among key nations proposed to Napoleon in Europe. Prime Minister Chamberlain announced in commons that the territorial would be almost tripled by a voluntary enlistment campaign.

At the same time, says the Canadian Press London correspondent, the prime minister announced his back on conscription and pinned his faith to the voluntary system to get the territorial army to the level of 130,000 men, which now numbers 130,000 on peace-time establishment.

Queen Elizabeth, one of her rare visits to the House of Commons—from which the King is barred by tradition—heard the answer to the speaker's question.

British United Press says Britain was reported to have abandoned plans for a public "Stop Hitler" declaration and to be seeking a closer association with key nations to aid each other if they were menaced by German expansionism.

## Refuse Concessions

Premier Daladier Asks Italy To Make First Move Towards

Paris.—Premier Edouard Daladier called on Italy to make the first move toward settlement of her territorial quarrel with France but warned that the French people would "rise as one man" against any refusal to their liberty or soil.

Refusing to make any territorial concessions in the Mediterranean, the premier said France would negotiate only on the basis of the 1923 accord with Italy, since despite, in an accord, the peaceful settlement "in the spirit of equity."

France is strong and getting stronger, Daladier declared, while the totalitarian powers disturb Europe by their demand for fulfillment of "natural aspirations" and their desire for "room to live, which is nothing less than the perpetual will to conquer."

### Bill Approved

Ottawa.—Third reading was given by the senate to the government's bill which amends the Prairie Farm Rehabilitation Act. Principally the measure vests in the minister of agriculture authority to perform duties incidental to operation of the

### Has Plenty Of Snow

Glasgow, B.C.—This village 40 miles east of Revelstoke in British Columbia has lived up to its name this winter with 437 inches of snow so far—but that doesn't touch Glasgow's record. The 48-inch record was set in 1906.

## Will Make Experiment

System Of Proportional Representation To Be Tried By France

Paris.—The French chamber of deputies has decided to adopt a system of Proportional Representation to give minorities in each district adequate voting strength in parliament.

By an overwhelming majority, the chamber voted to scrap the system of single member constituencies on which the present lower house was elected.

Divisions over "P.R." always have cut across party lines and the present lineup reveals the centre of the chamber as generally reserved in its attitude with the extreme right and extreme left both favoring the electoral experiment.

## WESTERN GRAIN FOR LIVESTOCK INDUSTRY IN EAST

Montreal.—Solution of western Canada's grain surplus problem by using excess grain as feed to build a great livestock industry in the east was proposed to the eastern Canadian agricultural conference by Dr. Chagnon, eastern director of the Quebec department of agriculture.

Declaring his proposed "national policy of grain marketing" would benefit all Canada, Mr. Chagnon said it would have the following specific advantages:

1. Offer an outlet for the western surplus.
2. Make possible export of finished products and help reduce unemployment through extra labor needed to distribute grain and feed, finish and process the livestock.
3. Decrease cost, altogether check, the "export of our fertility to other lands".
4. Help develop a profitable agriculture in eastern Canada.

With economical distribution of the surplus, if expense were involved or homes called for, public opinion would support the scheme because of its "national" benefits, Mr. Chagnon said. It might eventually lead to the feeding in the east of 100,000, 000 to 200,000,000 bushels of western foodstuffs.

The principle of a bonus for wheat, used as an emergency measure, could be regarded as a permanent solution," he declared.

Continued bonusing of wheat would lead to its production at expense of other grains necessary to a prosperous livestock industry.

The convention heard Agriculture Minister J. G. Gardiner forecast steps by the Dominion government to bring about better conditions in the dairy industry. The minister expressed hope that, by legislation or otherwise, the administration would be able shortly to make possible "a closer association between the organized processors in Canada in relation to the dairy industry." He would not disclose details for a few days.

The minister urged delegates from with a greater degree of co-operative organization among themselves to better farm conditions rather than depend too completely on governments for help.

"Governments can do half what producers could do if they were properly organized."

## THE WEDDING OF THE QUEEN'S NICE

## NEW SPANISH AMBASSADOR

London.—The British chamber of deputies has decided to adopt a system of Proportional Representation to give minorities in each district adequate voting strength in parliament.

By an overwhelming majority, the chamber voted to scrap the system of single member constituencies on which the present lower house was elected.

Divisions over "P.R." always have cut across party lines and the present lineup reveals the centre of the chamber as generally reserved in its attitude with the extreme right and extreme left both favoring the electoral experiment.

Declaring his proposed "national policy of grain marketing" would benefit all Canada, Mr. Chagnon said it would have the following specific advantages:

1. Offer an outlet for the western surplus.
2. Make possible export of finished products and help reduce unemployment through extra labor needed to distribute grain and feed, finish and process the livestock.
3. Decrease cost, altogether check, the "export of our fertility to other lands".
4. Help develop a profitable agriculture in eastern Canada.

With economical distribution of the surplus, if expense were involved or homes called for, public opinion would support the scheme because of its "national" benefits, Mr. Chagnon said. It might eventually lead to the feeding in the east of 100,000, 000 to 200,000,000 bushels of western foodstuffs.

The principle of a bonus for wheat, used as an emergency measure, could be regarded as a permanent solution," he declared.

Continued bonusing of wheat would lead to its production at expense of other grains necessary to a prosperous livestock industry.

The convention heard Agriculture Minister J. G. Gardiner forecast steps by the Dominion government to bring about better conditions in the dairy industry. The minister expressed hope that, by legislation or otherwise, the administration would be able shortly to make possible "a closer association between the organized processors in Canada in relation to the dairy industry." He would not disclose details for a few days.

The minister urged delegates from with a greater degree of co-operative organization among themselves to better farm conditions rather than depend too completely on governments for help.

"Governments can do half what producers could do if they were properly organized."

Declaring Britons are determined there are limits beyond which aggression cannot be allowed to go, Leslie Burgin, transport minister, told another London luncheon:

"We desire to stimulate in the minds of all free countries the intention to resist aggression by whatever insidious form it may be proposed to them."

Earl Winterton says Britons must be on guard to relate to Italy.

London.—Difficulties surrounding Europe are not going to pass away this summer, Earl Winterton told the National Fire Brigade Association.

"If you believe the immediate emergency has passed and the British people can go to sleep again," he said, "I cannot sufficiently impress upon you there is not the least likelihood of need for your services being less in the next few months or years than to-day. If you are going to rest, you must do so sleep again, living, every one of you must do your duty by the country in the next few months."

Declaring Britons are determined there are limits beyond which aggression cannot be allowed to go, Leslie Burgin, transport minister, told another London luncheon:

"We desire to stimulate in the minds of all free countries the intention to resist aggression by whatever insidious form it may be proposed to them."

## Would Build Liners

Advantaged New Vessels For Canadian-Australian Service

London.—Two 20,000-ton liners for the Canadian-Australian service may be built as a result of a comprehensive shipping subsidy scheme outlined in the House of Commons by Oliver Stanley, president of the Board of Trade.

They would ply out of Vancouver for Honolulu, Fiji, Auckland and Sydney.

The liners would be built in British ships at a cost of £1,000,000 (\$14,100,000).

Last July Sir Edward Beatty, Oliver Stanley's successor as President of the Canadian Pacific Railway Company, said the vessels would be built as soon as economic conditions warranted, building costs then being prohibitive.

It is reported the C.P.R. may also place additional orders for ships as a result of the subsidy but no confirmation can be obtained here.

According to this report, replacement of the liners Empress of Russia and Empress of Asia, both built in 1913, will be ordered.

The government's shipping subsidy plan had been under consideration for months. It is designed to halt the alarming reduction in the number of British merchant ships and preserve the shipbuilding trade, which has been stagnated for years in many parts of the country.

Since 1914, although there are now millions more people to feed, the number of British food-carrying ships has dropped by 2,000.

The Canadian Press provides the Canadian Broadcasting Corporation with news of foreign news were made before the committee.

The Havas service had to be watched diligently because that agency would "take advantage" of the committee's report, it said.

The Canadian Press noted the French viewpoint of European affairs might be dangerous, but honestly expressed, is a very good thing," Mr. Livesey said. "It would be a good thing if we could get the German viewpoint of affairs in Germany."

The special railway committee of the senate will find, when representatives of the Canadian Pacific and the Canadian National railways come before them this year, that greater advances have been made since last July in effecting co-operative economies than in any other previous period. Hon. Ronald Dandurand, government leader in the senate, told the committee.

Sessions of the committee were occupied by C. W. Peterson of Culter, president of the Farm and Ranch Review, Mr. Peterson had submitted a lengthy brief, and was examined in his presentation.

"Unification of the railways was the only solution of the present problem," Mr. Peterson said. He would divide the railways entirely from politics, placing them under an executive board of 15 men. He divided these as to five representatives from each of the railways and five from each of the five provinces.

Others from each of the railways and five from each of the five provinces. He divided these as to five representatives from each of the railways and five from each of the five provinces.

## SAYS DOMINION NEWS SERVICE IS BEST IN WORLD

Ottawa.—Canadian newspapers are receiving "the best cable news service in the world," J. P. H. Lavery, general manager of The Canadian Press, told the House of Commons radio committee.

All the resources of the Associated Press, the United Kingdom news gathering organizations, Reuters, British and Haas, French agency, were available to The Canadian Press in London and New York where British and foreign news were selected and prepared for Canadian consumption.

Mr. Lavery appeared to answer suggestions made by Hon. H. H. Stevens (Con. Kootenay East) before the committee that British press agencies should be used to obtain news from British agencies in preference to Havas.

Mr. Lavery said, was obtained mainly by Canadian staff men in the London bureau and from the Press Association, a British co-operative news gathering agency. Occasionally news was obtained from Havas.

The Canadian Press provides the Canadian Broadcasting Corporation with news of foreign news were made before the committee.

The Havas service had to be watched diligently because that agency would "take advantage" of the committee's report, it said.

The Canadian Press noted the French viewpoint of European affairs might be dangerous, but honestly expressed, is a very good thing," Mr. Livesey said. "It would be a good thing if we could get the German viewpoint of affairs in Germany."

## Preparing Seed Grain

The Treatment of Seed Grain For The Control of Disease

The health of seed grain is a factor of first importance in determining the yield and quality of the crop. When all of the other factors such as fertility, moisture and temperature are favourable for successful production, the crop may be a failure because of parasite which are seed-borne, or because of natural or artificial injury of the seed. Experiments conducted at the Dominion Laboratory of Plant Pathology at Saskatoon, states H. W. Wood, of that Laboratory, have shown that damp seed is relatively free of disease, produces better crops than low quality seed under the same conditions.

Examination of many samples of seed grain from different parts of Saskatchewan over a period of years has shown that none are relatively free of disease organisms. It has been established by experiment that no increase in yield can be expected incidentally from the use of clean seed, but substantial benefits do accrue from treatment of diseased grain. As a preliminary step, it is always advisable to have a germination test made and facilities for such are provided by the Dominion Department of Agriculture in each province.

It is possible to rid seed of most of the parasites it may carry. There are several ways of doing it. Some fungi like that of loose smut which are established on the seed and the difficult hot water treatment is required to kill them. A more practical method of dealing with such a disease is to use a seed plot which may be required. The fungi which cause bunt of wheat, the smuts of oats and the smut of barley are carried as spores and vegetative structures on the surface of seeds or inside the seed coat. Fungal particles may be killed by chemical treatment of some sort. Formaldehyde will attack among the formalin liquid treatment because of its cheapness and its general effectiveness, in spite of its tendency to injure the seed. To be effective, it must be properly applied, otherwise its benefits do not come. It will control effectively the smuts of oats, bunt of spring wheat and covered smut and black loose smut of barley. It is not advisable to treat shelled and other low grade seed with formaldehyde. Certain copper dusts, such as copper carbonate and basic copper sulphate will prevent smut of wheat in the absence of soil infection. In the case of some of the other diseases as well, copper dusts on the whole, are relatively ineffective against barley and oat smut except in highly infested seed. There are organic mercury dusts on the market which are very effective in the control of bunt of wheat, smuts of oats, covered smut and black loose smut and the stripe disease of barley. These dusts will also destroy the seed-borne bacteria which cause halo blight and leaf spot of oats, and black chaff of wheat. They destroy so effectively that cause seedling blight and if applied not more than a few days before seedling emergence, they frequently attack germinating seedlings.

Information on seed treatments may be secured from the Dominion Laboratories of Plant Pathology at Winnipeg, Saskatoon and Edmonton.

## Hard To Answer

Question Cambial Chief Asked About War Was Reasonable

This charming story from a Palm Springs newspaper reaches me from the United States says "Critic" in the New Statesman and Nation, London: An English missionary, in a chat with an old Negro cannibal of the tribe Niam-Niam, told him of the numerous number of victims of the world war.

"How could you," wondered the cannibal, "eat so much human meat?"

"We whites," answered the missionary proudly, "do not eat human beings."

"Well, then, what did you kill them for?" asked the cannibal in great astonishment.

Upward of 300,000,000 people attend basketball games in the United States in a year.

Argentina shipped nearly 600,000 tons of meat to England last year.

## United Kingdom Market

Efforts Being Made To Improve The Quality Of Canadian Products

Constructive steps being taken to improve quality and supply of Canadian products in United Kingdom are stressed in an article in the current issue of Canada Observer.

The article points out that at the time of the Ottawa Agreements on shipments of Canadian live better than 180,000 cwt. annually. Stimulated by the British preference and aided by an aggressive advertising and promotion campaign, our exports have steadily increased. The 1938 figure was approximately 1,300,000 cwt., a slight reduction from the 1937 peak.

Tribute is paid to the efforts made by the Department of Trade and Commerce and by the Department of Agriculture, toward improving the quality of Canadian products, and toward the building and maintenance of continuous supplies from this country. Aggressive merchandising efforts by means of contact of a staff of men calling on the retail and wholesale trade is said to have resulted in increased demand for Canadian bacon—Canadian bacon in hundreds of retail stores for the first time.

Plans are now being considered for marking Canadian bacon in retail stores with a special tag bearing the word "Canadian" and thus retaining its identity.

This is now being done most effectively with Canadian cheese and some effort being put into doing so because of its quality, which is emphasized by the advertising and promotion effort being put behind it by the Government's "Canada Calling" campaign, and this identity-marking system.

Local registration such as is practised in some other countries from which Britain draws her supplies, Canadian products will have time to suffer in respect of continuity of supply and uniform quality of products.

An concerted effort is now being made both here and in Great Britain to bring out the best of the excellent sales opportunities which abound in that market.—Financial Post.

## Wheat And Oranges

Crop As Precarious In California

Thomas E. Walsh, head of the Walsh Advertising Agency at Windsor, Ontario, has been picking wheat and oranges the other day, because of his yearning to pick an orange from a tree of his own.

According to W. L. Clark, in the Windsor Star, Mr. Walsh was in Los Angeles last but he refused to buy oranges which had been picked by someone else, he could do that in Windsor. He wanted to walk up into the control of him when he saw the smut of oats, covered smut and black loose smut and the stripe disease of barley. These dusts will also destroy the seed-borne bacteria which cause halo blight and leaf spot of oats, and black chaff of wheat. They destroy so effectively that cause seedling blight and if applied not more than a few days before seedling emergence, they frequently attack germinating seedlings.

Seed treatments do not control stem or root rot of cereals. However, any treatment which will aid a quick germination and rapid growth has indirect benefits in the event of rust attacks. This applies also to insect damage, particularly cover smut.

Information on seed treatments may be secured from the Dominion Laboratories of Plant Pathology at Winnipeg, Saskatoon and Edmonton.

## Health Rules

Adherence to certain health commandments will prolong life and give everyone a good chance of living to nearly 100. Dr. Malcolm T. MacEachern of Chicago declared at the annual convention with the annual meeting of the American College of Surgeons. Dr. MacEachern declared most people eat too much, worry too much and don't play enough.

Natives of South Africa are being made aviation-conscious by giving them free flights.

Paris France, is only 370 miles nearer the equator than is Alaska.

## NEW BRITISH AIRCRAFT CARRIER IN NAVAL EXERCISES

The Aircraft Carrier "Ark Royal" and her attendant destroyer "Wren" turn into the wind for the aircraft to fly off the ship during British naval exercises in the Mediterranean.

## True Voice Of Germany

Is Not Nazism Or Loyalty To Hitler Masses Write

The Germans are a peculiar people and submit rather readily to dictation, but the persecution which has taken place must have a lasting effect and does not make for the brand of loyalty which will fight to the death.

Many Germans are submitting quietly for the same reason that a law-abiding citizen, his hands up, when confronted with a loaded revolver.

That Germany has great military strength both in munitions and manpower is not questioned, but in a prolonged war—and it probably would be prolonged—Hitler's power would collapse.

In a recent book "Reaching for the Stars" by Nora Walsh, a 48-year-old Pennsylvania Quaker who lived in Germany from 1934 until last April, it is stated that the people are developing a reverence to Hitler as cunning as the Chinese peasants. All the young people in uniforms are not loyal Hitlerites. She quotes a mail recently promoted to undercover agent as saying, "You may think our radio is the voice of our people but it is not. The voice of Nazism is trumpeted but the true voice of Germany is a murmur."

That murmur might really ring into a roar under the strain of war conditions.

The tragedy is that thousands of innocent Germans as well as thousands of other nationalities would be slaughtered before Europe could be purged of its mad men.—Toronto Telegram.

## Have Never Tasted Candy

Luxury For Children In Central Africa Is Rock Salt

A woman travelling recently in Africa, was astonished to find that the little native children in Central Africa have never tasted candy, cakes or bull's eye candies. Their tastes are far more simple. Nothing pleases a little black boy or girl more than to be given a lump of rock salt to eat, so rare a luxury is salt in this part of the world. The taste of the rock salt is as delicious to natives as are candies to us.—Canadian Churchman.

Highest tide in the world is in the Bay of Fundy where there is a rise of 53 feet.

It is better to be small and shine than to be great and cast a shadow.

## Radio Programs

International Broadcasts Bring Peace From Abroad

The Canadian Broadcasting Corporation had laid out a program of developing a Canadian personality and fostering cultural and educational development through its facilities. General Manager Chelstone Murray told the parliamentary committee on radio broadcasting.

Needs of the rural population would be closely studied, the general manager said. Other matters on the program of the CBC included school broadcasts, improved information services, preparation for possible national emergencies and preparation for the advent of the "radio" in broadcasting.

International broadcasts had brought peace for the Canadian programs from all over the world, including a comment from Denmark that newspapers there considered the Canadian program last October under the auspices of the International Union of Radio Broadcasters of Geneva had been the best of the world's programs in that series.

## An Island Empire

Wealthy English Girl Rules Over Small Kingdom Near Nassau

A small kingdom with a British girl as its queen is the island of the Bahamas. Its ruler, states the Toronto Telegram, is Betty Cantara, the wealthy English girl who retired there after her annulment to beat Gar Wood at speedboat racing was abandoned as hopeless.

Handers of these islands lease them to the British Government for 99-year periods, and during their tenancy have absolute control of their territory. They collect taxes for the Government, and act as judge, jury and ruler over their subjects. Many Cantara has 200 residents on her island, and reports say that they admire their "chief" tremendously. She has built her own church, school and hospital and has organized boy and girl scout troops and a pretty good orchestra. The clergyman, teachers, nurses and doctors are all her personal employees.

Among birds, all members of the finch family have 12 feathers in their tails.

Rim cuts can be prevented by maintaining proper air pressure in automobile tires.

England still has about 200 extinct windmills in its boundaries.

## PAGEANTRY PRESENT AND TO COME

The Royal Horse Guards with colour pass down the Mall, London, while decorative poles are being prepared in honour of the visit of the French President.

## The Creeping Killer

Great Danger To Human Life From Carbon Monoxide Gas

The sombre tale of "the creeping killer" attached to carbon monoxide gas is fully justified, according to officials of the Industrial Accident Prevention Association, because it gives no warning of its existence.

Frequent press reports of fatalities throughout Canada draw attention to the fact that the hazard is particularly common in garages. One of the recent instances reported is the case of three men who ran their truck into a garage during the cold weather and left the engine running to warm up the building. Two fatalities were recorded and the third man was found to be seriously ill.

The danger of carbon monoxide is not confined to exhaust fumes from automobile engines. In any process, either in the home or industry, where coal, gas, oil or wood is used as fuel, there is a danger from carbon monoxide fumes resulting from incomplete combustion.

Many industrial processes present a hazard of carbon monoxide poisoning and special accident prevention warnings are given wherever necessary by the Industrial Accident Prevention Association.

The chief and most common hazard from "the creeping killer" seems to exist in garages, according to a survey just completed. Because the public as well as industry is exposed to the risk, a special bulletin has just been issued with clear and concise instructions regarding the effects of the gas and methods of applying resuscitation.

Symptoms of carbon monoxide poisoning include a ringing in the ears, upset stomach, a sense of "chilliness," pressure in the temples, dizziness, weakness, and in some cases convulsions and blurring of the vision. The victim is often unconscious.

Emphasizing the danger of carbon monoxide, the safety bulletin points out that life is in danger if there is one-third of a litre of the gas in the air. Garages should be checked from the standpoint of reasonable ventilation. It is necessary to run an engine in a garage, see that the doors and windows are open.

Check for accumulation of carburetor and motor; for leaky exhaust connections, loose floor boards, and defective exhaust pipes and mufflers.

Keep closed cars reasonably ventilated and avoid the growing tendency to keep all car windows closed in disagreeable weather. At first sign of a headache or drowsiness, open the car and get out into the fresh air clear up the trouble.

The bulletin warns against giving a patient any headache powders or tablets for relief of a headache due to inhalation of carbon monoxide fumes. It is said such drugs can only keep the car and get out into the fresh air clear up the trouble. The bulletin warns against giving a patient any headache powders or tablets for relief of a headache due to inhalation of carbon monoxide fumes. It is said such drugs can only keep the car and get out into the fresh air clear up the trouble.

## A Rich Market

Canada Has First Place In Britain For An Important Group Of Commodities

The place of Canada in the rich British market is reported by the Dominion Bureau of Statistics in an analysis of the United Kingdom's trade for January.

For that month Canada held first place in the British market for an important group of commodities, including wheat, wheat meal and flour, fresh apples, canned lobsters, aluminum and alloys, copper, unwrought nickel, zinc, non-ferrous metals and manufactures, wool and timber, undressed hides, bones and shoes wholly or partly of rubber, and certain prepared leathers.

And Canada was second with such goods as bacon, ham, unmanufactured tobacco, iron manufactures of wood and timber, paper and cardboard.

Such a market is for Canada a tremendous asset, worth every effort directed towards its maintenance and development.—Ottawa Journal.

## Chinese Justice

A court over which white man has no say found a Chinese to be "traitor" to the Chinese cause and guilty of an insult to Generalissimo Chiang Kai-shek, head of the Chinese army. He was sentenced to fine of \$100 and a half-hour parole through Toronto's Chinatown carrying a placard bearing the words "Traitor To China."

The saltiness of seawater is no similar to the saltiness of human blood, that, times are kept alive in laboratories in modified seawater solutions.

Many Philippine natives still build their homes in trees.

## NEWSPAPERS WILL RECEIVE 98% OF MOVIE ADVERTISING

NEW YORK—Newspapers will receive 98 per cent of the 1939-40 advertising budget of Warner Brothers Pictures, Inc., the largest budget in the company's history. S. C. Entlich, announced recently at the Warner sales convention, stating that experience of the company over a long period of years had satisfied them that newspapers were the most valuable advertising medium.

## MODERN YOUTH

"How old are you?" inquired the visitor of his host's little son. "That is a difficult question," answered the young man, removing his spectacles and wiping them reflectively. "The latest personal survey available shows my psychological age to be 12, my moral age 4, my anatomical age 7, and my physiological age 6. I suppose, however, that you refer to my chronological age, which is 8. This is so old-fashioned that I seldom think of it any more."

## BUY IN CARBON

**"I've protected myself,  
my family and my home"**

"I USED TO WORRY about what I would do when I got too old for work, and about what would happen to my family if I should die.

"All of these worries have disappeared — thanks to my Life Insurance. Now I know that I will have a comfortable nest-egg when I'm 60 or 65, so that my wife and I can take things easy. And if I don't live to old age, then Life Insurance will provide my wife with money to pay the bills and help give my children an education."

Like this typical farmer, tens of thousands of other Canadians are today enjoying new peace of mind and new security through their regular savings in Life Insurance.

## Snicklefritz

"Have you ever been X-rayed?"  
No, sah, but ah been ultra violated."

Here is a story about the most optimistic man: Totally bald, he went to a drug store and asked for a bottle of hair restorer. "Yes, sir," the clerk said, "here is a preparation that's sure to make your hair grow."

"All right," replied the optimist, "I'll take a bottle. And please wrap up a comb and brush with it."

Jaeger: Got you hands up, bruddah! Restass: Can't do it 'cause ah's got rheumatism in mah hands.

Jaeger: Nahler mind dat: Ah's got arthritis in mah hand.

Restass: Bruddah, yo' wrist!

Professor (finishing last algebra problem): "And so we find that X equals zero."

Sophomore: "All that work for nothing."

Householder (to prospective maid): "Why did you leave your last place?"

Maid: "Oh, it was so dull. They were trying to live on their income."

The family and their guest had just seated themselves at the table. "Basil!" said the mother, "why didn't you put a knife and fork at Mr. McKinn's place?"

"He don't need any, mother," replied Sannie. "You said he eats like a horse."

And then there was the man on relief who was so accustomed after years of unemployment to having everything done for him that he went out and married a widow with three children.

A lady was entertaining her young friend's small son. "Are you sure you can eat your meat?" she asked, after watching his struggles.

"Oh, yes," he replied, without looking up from his plate. "We often have it as tough as this at home."

## FISH STRETCHES THE BUDGET

Our Canadian fish is the finest in the world. It is plentiful, nourishing, and contains plenty of those invisible aids to good health—Vitamins A and D. These are the vitamins that help us resist colds and all other ailments. They build up resistance and make crisp, cold days a pleasure.

There are so many kinds of Canadian fish, packed in cans, quick-frozen and in some markets rubbed fresh to the stores, that great variety is possible. The way to stretch the budget is to watch the daily fluctuation in price, and pick up brands with well-known Canadian names, packed in Canada.

Here's a recipe you will use frequently. It's a stick-to-the-ribs dinner that is appetizing, flavorful and most delicious.

**Browned Chicken Haddie Lyonnaise**

1 can chicken haddie  
2 cups cooked, diced potatoes.  
2 tablespoons minced onions.  
1 teaspoon prepared mustard.  
Dusting of paprika.

2 tablespoons butter.

1 hard-boiled egg, chopped.

1 cup milk; 1-4 teaspoon salt.

2 tablespoons butter.

Heat the potatoes in the butter.

Add the hard-boiled egg, and onions.

Combine the milk with seasonings.

Add to the potatoes. Flake the fish and add. Push to one side of the frying pan, melt the rest of the butter, cover the pan and cook until well-browned. Fold over and serve hot.

## FREUDENTHAL BAPTIST CHURCH

SUNDAY, APRIL 9, 1939

FREUDENTHAL CHURCH —

10 a.m.—Sunday School

11 a.m.—Special Easter worship.

Union meeting of both stations.

A special choir of over 55 voices will sing: "Rejoice in the Lord"

by Carrie B. Adams, "King All-Glorious"

by George M. Vail, "So sendeth each"

by von Berg.

Pianist, Miss M. Ohlhauser.

Dirigent, Christ Harrell.

12 a.m.—Holy Communion.

ZION CHURCH—7 p.m.—Both stations will gather for another worship.

Our mass choir will sing.

Sermon: "I am the Resurrection and the Life," John 11:25.

GOOD FRIDAY—

11 a.m. Union Meeting. Male chorus and Zion choir will render music.

Sermon: "The Seven Words of Jesus at the Cross."

To all the above meetings the public is cordially invited.

## MIDLAND PACIFIC GRAIN CORPORATION LIMITED

The Hon. John Bracken advises reclaiming lost wheat markets.

Salesmanship is required.

Somebody failed in recent years.

The "Midland" has aggressive salesmen always pressing for higher and wider markets.

**HOTEL YORK**  
CALGARY  
CENTRE ST. & 7th AVE.  
ALSO OPERATING  
**HOTEL ST. REGIS**  
RATES \$1 and \$1.50 — WEEKLY and MONTHLY RATES

## Commercial Printing

Do not try to economize on necessary expenses. Neatly printed business stationery is just as important to your business as any other of your necessary expenses, and it is poor economy to do without it. Blank writing paper and forms on which your name is written in with ink do not raise the prestige of your business. And if it's economy that you want, see us and find that our new prices are most reasonable.

## The Carbon Chronicle

If it's grain... Ask us!
